EDUCATION

► PhD ECONOMICS (Central European University) 2025 - Currently working on various research projects often involving both theory and experimental work around information acquisition, economics of information and bounded rationality.
Teaching experience: Data analysis 1 & 2.

► Msc ECONOMICS (Lund University) 2023-25
Courses: Individual choice (proof based microeconomics), Foundations of Finance, Strategic Interaction (game theory & mechanism design), Economic and Financial Decision Making, Microeconometrics, Advanced Development Economics, Advanced Econometrics, Advanced Macroeconomics, Advanced Microeconomics, Mathematical Methods, Econometric theory
Theses:
1) *"A model of asymmetric information and driving schools"* Supervised by: Alexandros Rigos, Erik Mohlin
Model(s) of a market with expert sellers. The thesis focused on communication within an asymmetric information, game theoretic framework.
2) *"Adaptive Salience theory with endogenous reference points"* Supervised by: Alexandros Rigos
This work aimed at creating a theoretical model of dynamic salience theory with changing reference points based on psychological and neuroscientific motivations. Convergence results were derived analytically and expanded upon and validated through simulation.

► Bsc INTERNATIONAL ECONOMICS (Jönköping University) 2020-23
Courses: (Introductory & Intermediate) Microeconomics, Econometrics 1&2, Business Statistics 1&2, Macroeconomics and Finance, (Introductory & Intermediate) Macroeconomics, Basic Financial Accounting, Corporate Finance, International Entrepreneurship, Organizing and Leading a Sustainable World, Geographical Economics, Introduction to Economic Thought, Development Economics
Thesis:
"Data Misinterpretation: A Consequence of Data Structure? - A Cognitive Imperfection and Its Economic Implications" Supervised by: Lina Bjerke

EXCHANGE SEMESTER (Tilburg University) 2022
Courses: Economic Psychology, Linear Algebra, Multi-agent Systems, Digitization & Big Data Analytics, Creative Entrepreneurship

ADDITIONAL COURSES AND CERTIFICATES

Summer Course in Epistemic Game Theory 2025, Game Theory II - Advanced Applications 2022, SQL for Datascience 2023, Excel 2016 Advanced 2023, Psychology: Cognitive Neuroscience 2025 (Lund University)

WORK EXPERIENCE

RANGE SUPPORT RESOURCE (Inter IKEA Group)
The assembly and management of datasets regarding IKEA food range. Creation of dashboard(s) for data management and visualization. A combination of team and individual work, to help company oversight, and understanding of sales and its global market. The results of the project were to be used long term, and to be general use. Therefore presenting the result and progress towards it while surveying stakeholders' needs was crucial, as well as focus on actionable-ness and ease of use.

EVENTS AND PROJECTS

E-Challenge 2022 & 2023

Participated in this competitive event for two consecutive years, dedicated to devising innovative, customized business solutions for visiting companies. Collaborated closely with multidisciplinary teams of business/economics/finance and engineering students to propose solutions for companies such as: T-Emballage and Huskvarna Group. Advanced to the final round both years, highlighting strong teamwork and effective problem-solving skills under time pressure, as the competition is restricted to 2 days for developing solutions (similar to a hackathon).

Hub AI 2023-2025

This is a community centered around programming, AI and machine learning related workshops and seminars. I have been attending these during my time in Lund University. They extended my programming and machine learning knowledge.

PROGRAMMING LANGUAGES

Python, Stata, SQL, Netlogo, LaTex, R

LANGUAGES

Native: **Hungarian**, Fluent: **English**, Intermediate: **Swedish**, Basic: **French, German**
